

pip._vendor.pygments.formatter.
Formatter

string

name

pip._vendor.pygments.formatters.terminal.
TerminalFormatter

```
classDiagram
    class Formatter["pip._vendor.pygments.formatter.Formatter"]
    class TerminalFormatter["pip._vendor.pygments.formatters.terminal.TerminalFormatter"]
    class String["string"]
    TerminalFormatter --|> Formatter
    TerminalFormatter ..> String : name
```

The diagram illustrates the relationship between three classes. At the top left is the `Formatter` class, represented by a white box with a black border. At the bottom is the `TerminalFormatter` class, represented by a gray box with a black border. A solid blue arrow points from the `TerminalFormatter` box up to the `Formatter` box, indicating inheritance. To the right of the `Formatter` box is a small white box labeled `string`. A dashed purple arrow points from the `TerminalFormatter` box to the `string` box, with the label `name` placed next to it, indicating an association.
