

namedtuple

url_attrs

`pip._vendor.urllib3.util.url.Url`

```
graph BT; A["pip._vendor.urllib3.util.Url"] --> B[namedtuple]; A --> C[url_attrs];
```

The diagram illustrates a class inheritance structure. At the bottom is a gray rectangular box containing the text `pip._vendor.urllib3.util.Url`. Two blue arrows originate from the top edge of this box. One arrow points diagonally up and to the left to a white rectangular box containing the text `namedtuple`. The other arrow points diagonally up and to the right to another white rectangular box containing the text `url_attrs`. This indicates that `pip._vendor.urllib3.util.Url` is the base class for both `namedtuple` and `url_attrs`.
